Professional Summary

Computer Science Engineering student with hands-on experience in data analysis, visualization, and machine learning using Python and SQL. Skilled in converting raw data into actionable insights through dashboards, forecasting, and analytics projects.

Technical Skills

- **Programming:** Python, C
- **Data Analysis Libraries:** Pandas, NumPy, Scikit-learn
- **Web Development:** HTML, CSS, React
- **Database:** MySQL
- **Cloud:** AWS, G Cloud
- **Data Visualization:** Power BI, Tableau
- **Tools:** Git, VS Code

Education

Bachelor of Engineering in Computer Science

Sai Vidya Institute of Technology, Bengaluru

Projects

Retail Inventory Dashboard

Python, Streamlit, Plotly, Pandas

- Developed a real-time inventory analytics dashboard for retail with 8+ charts and tables, resulting in a 25% faster identification of stock shortages and sales trends.
- Automated daily inventory alerts via email, reducing issue response times by 30%.
- Integrated MySQL backend with AI-based demand forecasting using Prophet, enabling accurate sales prediction and restock trigger

GitHub: github.com/amruthssss/retail-dashboard

EV Charging Analytics Platform

Python, FastAPI, Streamlit, Plotly, Pandas, Prophet, Docker

- Built an end-to-end EV charging analytics app (forecasting, duration prediction, clustering, EDA) that reduced station analysis time by ~40% and improved data visibility across stakeholders.
- Containerized API and UI with Docker Compose, added health checks and environment-based config, enabling one-command local demos and cloud deployment for recruiters and product teams
- Implemented Prophet forecasting with baseline fallback, Plotly dashboards, and SMTP exports (CSV + HTML chart), speeding forecast distribution and decision-making by ~30%

GitHub: github.com/amruthssss/keySpotting

Multimodal Surveillance System

Python, EfficientNet, TimeSformer, YOLOv8-Pose, React, Flask

- Developed a real-time system to detect threats such as accidents, fire, smoke, explosions, and fights with instant alert notifications to the owner.
- Combining facial expression, pose, and activity data for intelligent behavior analysis.
- Includes dynamic audio alerts with different sounds for various detected threats.

Certifications

- Artificial Intelligence Fundamentals, IBM SkillsBuild (Oct 2025)
- Python for Beginners: Data Structures, Coursera Project Network (Oct 2025)
- Python Data Analysis, Coursera (Rice University) (Oct 2025)
- Introduction to Networking and Cloud Computing, Coursera (Microsoft) (Oct 2025)
